Unit 4

World Orange Production (2017-2021)

Country	2017	2018	2019	2020	2021
Brazil	12,053	13,165	15,482	16,982	18,998
U.S.	8,562	7,453	9,321	6,349	4,500
China	8,391	4,555	7,397	8,921	7,507
E.U.	4,563	4,871	4,989	5,551	6,603
India	8,776	9,091	8,898	9,769	10 806
Mexico	4,898	3,777	2,992	3,878	4,003
Spain	3,325	2,671	2,906	3,287	3,422
Egypt	1,784	2,117	2,453	2,643	2,900

Unit 4

The table and chart above show orange production trends for several major countries between 2017 and 2021, measured in thousands of metric tons. Looking at the data, Brazil consistently leads in production and shows steady growth each year, increasing from 12,053 in 2017 to 18,998 in 2021. India also demonstrates gradual growth over time, while Eastern Union shows a smaller but steady increase. In contrast, the United States experiences noticeable fluctuations and an overall decline by 2021. Other countries, such as China and Mexico, show more variation with no consistent upward or downward trend. Overall, the chart helps visualize these patterns more clearly, making it easier to see which countries are increasing production and which are more inconsistent over time.
